My story!

Winter School

Leoben, February 2026

ENVH E I

My background

I am a 21 year old Automation And Robotics student from Poland. I study at the Silesian University of Technology.

Julia Urbanek

Problem-Solving and Soft Skills

: The innovative solution that I proposed was the multi-functional basket, that could be used for many generations

: Our team's strategy for sharing ideas was brainstorming together and helping each other see our visions

: My main responsibility was creating the basket. We made a deadline to finish all the projects.

Sustainability Awareness and Green Competences

: Environmental sustainability is a really important aspect for me because it directly involves my future and my well being.

: My main motivation is the future of millions of people and animals, I want what's the best for them

: First and foremost project managers should use more sustainable resources and take care of the waste being produced during the project

Problem-Solving and Soft Skills

-  What **new problem-solving skills** have you developed during the activities?
-  How has your **ability to analyze complex problems** improved?
-  Can you give an **example of an innovative solution** you proposed?
-  What have you **learned about working in interdisciplinary teams**?
-  How has **your role** in group work changed or improved?
-  What **strategies did you use** to share ideas effectively?
-  How did you **handle disagreements or conflicts** within the team?
-  What did you **learn from your teammates'** perspectives or disciplines?
-  How did you take **responsibility within your group project**?

Sustainability Awareness and Green Competences

-  What does **environmental sustainability** mean to you now?
-  How has **your attitude toward sustainability** changed?
-  Do you think **sustainability** should be part of all university curricula? Why?
-  How important are **sustainability competences for your future career**?
-  **What motivates you** to promote sustainability professionally or personally?
-  What **sustainability challenges** can you now identify **in your field**?
-  What **actions can you propose to reduce environmental impacts** in projects?
-  Describe a **sustainable solution you helped develop**.
-  How has **collaboration influenced your approach to sustainability**?
